

WATER SNAKE TROLLING MOTOR

WaterSnake T24 Asp 24 Pound Thrust 12V Electric Trolling Motor 24" Shaft

Product description

- If you're after lightweight and portability, this is it.
- This motor weighs a mere 2.2kg and is ideal for powering kayaks, canoes, small dinghies and inflatable boats, especially if you have to carry your craft to the water.
- The simple design keeps the weight down while delivering the performance you need.
- There is a high and low speed control, a forward and reverse switch, and extendable handle for easy steering, a 24" (61cm) shaft plus an anti-impact clip system in the mount. The two-blade propeller is a weedless design.
- Included is both the electric motor and the mounting bracket.

The motor included with this kit has 24lbs of thrust.

Optional
With universal mounting bracket

Motor Specs:

24lb Thrust
12v battery compatible
Forward/Reverse - High and Low speeds
Low Speed—ideal trolling speed
10.5" Shaft length
Weight = 6 lbs.

FAQS:

How long will the motor last?
35AH Battery - 5 hours
70AH Battery - 9+ hours

We recommend buying an AGM Type Battery, we find at trolling speeds we can get 2 days fishing, trolling from it!

How do I connect it to a battery?

Each motor will have a positive and negative clip that will clamp onto any battery terminal.

What kind of battery do I use?

We recommend a 12 volt deep cycle marine battery only.

Is the battery included?

No, we cannot ship batteries. You can purchase one from any local big box store.

Other optional items included:

Transom mount included to be used with custom transom mounts on any kayak.
